Project Report: Basic HTML Profile Page

Project Overview

The Basic HTML Profile Page project aims to create a simple and visually appealing personal profile webpage. The page will feature a profile picture, a brief "About Me" section, and contact details. This project serves as an introduction to HTML structure and the layout of personal information.

Objectives

1. **Profile Picture**: Display a personal image prominently.
2. **About Me Section**: Provide a brief description of the individual.
3. **Contact Details**: Include relevant contact information.
4. **Responsive Design**: Ensure the page is accessible and looks good on various devices.

Technologies Used

- **HTML**: For the structure and content of the profile page.

Features

1. **Profile Picture**: A clear and centered image representing the individual.
2. **About Me**: A concise paragraph that summarizes personal interests or professional background.
3. **Contact Information**: Email, phone number, and links to social media profiles..

Development Process

1. Planning

- Defined the content and structure of the profile page.
- Created a wireframe layout to visualize placement of elements.

2. Design

- **HTML Structure**: Created the basic elements of the profile page.

3. Implementation

- Constructed the HTML file to include the profile picture, "About Me" section, and contact details.

4. Testing

- Checked the page on various browsers and devices to ensure compatibility and responsiveness.
- Validated the HTML to adhere to web standards.
